WORK EXPERIENCE

University Communications Boston College Chestnut Hill, MA

May 2017-present

Web Assistant to the Director: Scott Olivieri, Ph.D.

- Develop websites by adding content using Adobe Experience Manager Management System
- Test websites and links for bugs and errors prior to firm actual launch dates set by clients and managers
- Add web components to new and existing webpages such as images, videos, and interactive maps in order to display content related to the client's requests
- Manage multiple web projects throughout the work week before any upcoming deadlines

Express For Less Saugus, MA

June 2015-July 2018

Logistics Coordinator

- Managed and completed online orders made by customers through an online seller's webpage that included products such as furniture, bedding, electronics, clothing, jewelry, and watches
- Input item name, order number, profit, revenue, SKU number, shipment tracking number, date of purchase on Google Spreadsheet in order to keep a record of the amount of orders and revenue generated for each quarter
- Collaborated with 3 employees and manager to inform about customer needs

PROJECTS

Happy Camper Italia Campsite Application

Full Stack Web Application

- Allows users to create an account and post a campsite including its name, price, image, and location
- Other users can comment existing campsites and administrator can edit or delete them
- Created using MongoDB, Vanilla JS, Express.js, and Node.js.

Flex Mobile Vendor Site

Full Stack Web Application

- Users can select a smartphone, add it to the cart, and place an order even through PayPal.
- Created using XAMPP stack package as well as implementing PayPal API.

BeFit Fitness Center Site

Front End Web Project

- Created a gym website using HTML, CSS, JavaScript, and Bootstrap 4 Framework.
